DERMAQUEST

"Working inside out, instead of outside in"

Targeted solutions for every skin type

since 1999 we have crafted the absolute finest skincare products and continue to do so as we embrace our role as the leader in plant stem cell technology and as a top international skincare brand.

Innovated products that address every need and desire, advanced delivery systems and our unique line takes skincare to the next level of excellence and that is pure skin science.

Skin peels and resurfacer treatments are designed to exfoliate your skin and encourage it to refresh itself by creating fresh new skin cells.

They also stimulate the skin's natural collagen production to help target the appearance of fine lines and wrinkles.

Skin peel treatments make use of acids and enzymes to exfoliate away layers of the skin to reveal fresher, clearer, more youthful looking skin beneath the surface. Resurfacers are a milder type of skin peel and are sometimes referred to as 'superficial exfoliating treatments'.

The powerful blend of ingredients in skin peels work to visibly reduce the appearance of open pores, remove dead skin cells, target blemishes, acne and pigmentation, and visibly smooth fine lines and wrinkles.

MICRO ROLLER SYSTEM

DERMAROLLING

Dermapure Dermarolling - £80
Course of 3 - £200

Dermapure Dermarolling system uses a process of advanced skin micro-needling to produce natural, long-lasting results in skin rejuvenation using the Dermaroller. The advanced micro-needling procedure is designed to stimulate your skin, encouraging it to regenerate and repair itself naturally, producing smoother, brighter, younger and healthier looking skin. The Dermapure Dermaroller treatment is clinically proven to be effective on:

- Scars (including acne)
- Sun damaged and ageing skin
- Facial and decollete lines and wrinkles
- Stretch marks
- Maximise results and get your skin looking its best by combining micro-needling treatments with one of our Dermaquest skincare programmes.

Dermarolling is a natural skin regeneration and Scar Repair Therapy.

HOW DOES IT WORK?

Dermarolling is designed to produce thousands of micro-needle columns in the skin, which in turn stimulates the skin to naturally regenerate and repair itself. As part of this stimulation new collagen can be formed, new skin cells generated and the structure of the dermis, the lower level of the skin enhanced.

WHAT RESULTS CAN I EXPECT?

This natural process takes time, it can take up to six weeks before you see significant results - although the process will continue over the following months and several treatments are usually required. The results are not only smoother, brighter rejuvenated skin, but it can also lead to an improvement in the appearance of acne scars and stretch marks.

WHAT DOES THE TREATMENT INVOLVE?

Before your treatment is started your skin will be numbed with topical anaesthetic (can take up to 40 mins), so you'll remain comfortable throughout. The recommended treatment course is usually six treatments between 2 - 6 apart.

AFTER THE PROCEDURE

In the days following your Dermalolling procedure as the skin starts to regenerate and repair itself it may well feel drier than normal. Our Therapists will advise what specialist skincare is recommended to optimise your procedure.
